

Agenda

The Safety Assessment as Tool for Global Compliance of Cosmetic Products and their Ingredients

09:00-09:10 : Welcome, Introduction of the Topic and the Speakers - Steven L. Hanft

09:10-09:30 : FDA Requirements for Establishing the Safety of Cosmetics
Karl Popp

09:30-10:15 : The EU's Cosmetics Product Safety Report (CPSR)
- Principles for raw material assessments – dual approach
- Evaluation of the CPSR's use for global legal compliance and market entrance processes
- Annex I of the European Cosmetics Regulation
- Approaching optimum CPSR formats
Dr. Annelie Struessmann

10:15-10:30 : BREAK

10:30-11:30 : The Individual Safety Assessment - addressing Raw Materials, Ingredients, Impurities
- Key toxicological endpoints
- Weight of evidence approach
- TTC concept
- Technically unavoidable impurities
- Packaging and application aids
- Guidance documents
Dr. Uwe Rossow

11:30-12:00 : Interactive Panel Discussion, moderated by Karl Popp

12:00-01:00 : LUNCH

01:00-01:45 : Testing Cosmetic Products for the Support of their Safety Assessment
- Performance testing vs. safety testing
- Microbiology / phototoxicity / in-vitro tests
Craig R. Weiss

01:45-02:45 : The Cosmetic Product Safety Assessment (CPSA)
- Exposure Evaluations
- Safety margins
- Calculation of the MoS
- Considerations for sensitive population groups and/or body areas
- Testing needs
- Stability, microbiology requirements
- CPSA reasoning
- Product labelling, incl. claims, warnings, instructions of use
Dr. Uwe Rossow

02:45-03:30 : BREAK

03:30-04:15 : After the Implementation of the Animal Testing Ban – Globally resulting Issues and how Cosmetics' Safety will be assessed in the Future
Dr. Annelie Struessmann

04:15-04:45 : Interactive Panel Discussion, moderated by Karl Popp

04:45-04:50 : Farewell - Steven L. Hanft
